

SDI EMAIL ENCRYPTION SERVICE

- Centralized, policy based email encryption to assist with regulatory compliance
- Directory based key distribution for transparent encryption to 20 million email addresses
- Automatic scanning of content and attachments to ensure vital data is secure
- Integrates seamlessly with other email security solutions including SDI's Enhanced Email Spam/Virus filtering
- Custom branded portal for retrieval of messages by 3rd parties that do not subscribe
- Encrypted read, reply, compose and save capabilities for recipients, business partners, customers, patients, etc.
- Ability to take action based on policy: encrypt, reroute, block, etc.
- Hosted solution for small companies without an email server
- Easily ensure privacy and meet regulatory compliance requirements
- Directory size growing by 100k+ weekly
- Allows subscribers to communicate seamlessly and securely – inbox to inbox
- Ability to add secure email link to your website, allowing customers to safely communicate with you
