

PREMIUM SECURE EMAIL SERVICES

FEATURES & BENEFITS AT A GLANCE

- SEAMLESS LDAP INTEGRATION
- GLOBAL POLICY MANAGEMENT
- RICH HTML REPORTING
- DHA, DOS & BOT-NET PROTECTION
- ADVANCED END USER BASED SPAM CONTROLS
- AUTOMATIC SPAM AND ANTIVIRUS UPDATES
- CONTENT ANALYSIS
- ATTACHMENT CONTROL
- ADVANCED REPUTATION MANAGEMENT
- INBOUND AND OUTBOUND POLICY CONTROL
- LANGUAGE CONTROL (I.E. BLOCK ALL CHINESE TEXT)
- SCALABLE TO ANY NUMBER OF USERS*

High-Performance, Highly Scalable E-mail Security

Status quo vendors cannot keep up with today's increasing volumes of sophisticated e-mail attacks, stricter new compliance regulations and dynamic business environments. Enterprises demand powerful solutions that reduce costs and complexity.

Offering outstanding performance value, Secure Designs, Inc. Premium Email Security delivers highly effective, responsive protection that streamlines administrative overhead. The Secure Designs, Inc. Premium Email Security solution provides self-running, self-updating, future-proofed security. Scanning both inbound and outbound traffic, Premium Email Security boosts productivity by stopping spam, viruses and phishing; and supports regulatory compliance by blocking leaks of confidential data.

FEATURES & BENEFITS IN DETAIL

Seamless Active Directory and LDAP integration

Ensures that Email Security solutions automatically synchronize with Active Directory and LDAP servers to automatically manage e-mail addresses, accounts and user groups.

E-mail policy management

Enables IT to enforce organizational policies such as preventing the dissemination of inappropriate content, protecting confidential information, adding e-mail disclaimers or blocking distribution of executables.

Advanced Policy Compliance

Enables organizations to meet regulatory requirements, based on government legislation, such as, HIPAA, FERPA, GLBA, or SOX & PCI. Compliance with corporate and regulatory requirements is provided through a robust feature set including: Compliance dictionaries, Attachment Scanning, Record ID matching, Predefined policies, Approval Boxes, Email archiving, and compliance reporting.

Robust reporting

Provides easily customizable, system-wide and granular reporting, including information on attack types, solution effectiveness and built-in performance monitoring

PREMIUM
SECURE EMAIL
SERVICES

DHA, Dos, and Bot-net protection

Starts with powerful connection management capabilities to defer, throttle or block invalid connections before they reach your system. When combined with anti-spam, antiphishing and anti-virus capabilities these capabilities establish a complete solution for stopping all types of e-mail threats.

Advanced Reputation Management

Combines Sender IP Reputation plus Dell SonicWALL's GRIDprint Reputation Service to reject up to 80% of known junk e-mail at the connection stage with any remaining junk e-mail being removed in the Advanced Content Management stage. Advanced Reputation Management not only improves overall system scalability and performance but unlike other vendor's systems all connections are logged, offering greater peace of mind.

Advanced end-user controls

Enable administrators to give end-users greater control over their own spam management, allowed and blocked lists, spam aggressiveness, and account delegation. Using the downloadable Junk Button for Outlook® plug-in, end-users may actively respond to junk e-mail that inadvertently arrives in their inbox. The administrator defines all end-user controls, and may assign them by user, group or function.

Inbound and outbound e-mail threat management

Monitors content passing bi-directionally through the SMTP gateway. Utilizing award-winning anti-spam, anti-phishing and advanced anti-virus technologies, Stops inbound e-mail threats before they invade the network. Outbound e-mail and attachments are inspected and properly blocked or routed to prevent confidential information leaks.

Rapid Installation and ease-of-management

Drastically reduces the burden on IT departments to implement and manage a comprehensive e-mail security solution. Judgment Details provides insight into message judgment to ease troubleshooting and prevent legitimate e-mail from being junked.
