Quick report access or trouble ticket addressing a problem or question? Online portal provides immediate access to help & resources

MANAGED INTERNET SECURITY

The Peace Of Mind Of Exclusive Multi-Layered
Enterprise-Class Security For Small-Midsize Companies

FEATURES INCLUDED: ➤ BENEFITS PROVIDED:

Secure Email Filtering (Preemptive, Spam Scanning & Virus Filtering for Email Traffic) [Requires customer-specific domain; Up to 100 Email boxes included (free); support for additional boxes available]

Do you have a company-specific Email domain? SDI will scan your Email traffic in the cloud (up to 100 Email boxes) for SPAM, viruses, and spyware before it hits your network. PREMIUM Filtering also available [Active Directory required]

Site to Site VPN (Hub-Spoke, Multi-Hub, and Full-Mesh [max. connections determined by hub Firewall device model])

If you have multiple locations SDI will connect them so that when you sit at "location A", you will have access to resources at "location B".

Remote IP-Sec VPN licenses (Maximum depends on Firewall model)
Remote SSL VPN (1 or 2 licenses included – Max. depends on Firewall model)

Remote workers or telecommuters?.... Or do you just want to check in on something from home or while traveling? You don't need to use any other remote connectivity anymore—we can connect you via your choice of IP-Sec or SSL remote VPN

Active Directory Integration and SSO (Provides group authentication and local user groups configurations)

If you have a local user group server, SDI will link the firewall to it. Then you can filter local user groups, remote VPN rights by group, etc.

WAN Failover/Load Balancing

Available support for a second connection? SDI can setup policies on the firewall to provide automatic failover for backup and also balance the load of different traffic across both your connections.

Bandwidth Management

Throttle traffic on users' streaming music to make sure Internet capacity is there for company VOIP...or give priority to whatever type of traffic you select.

MANAGED INTERNET SECURITY

The Peace Of Mind Of Exclusive Multi-Layered
Enterprise-Class Security For Small-Midsize Companies

FEATURES INCLUDED:  **BENEFITS PROVIDED:**

Zone-based Firewall
(De-Militarized Zone/DMZ
for local webserver, WiFi
& other needs)

 Do you need to segregate resources on
your network for outside traffic?
This can be handled as a one time set
up without any extra fees.
