DESIGNS  
SUMMARY

## Secure Designs provides total Internet security solutions for the smallest to midsize organizations

As a complete, outsourced Internet security department that designs, implements, monitors and manages customers' network defenses 24x7, SDI provides around-the-clock peace of mind that an organization's computer operations, network and confidential digital assets will not be accessed or compromised by hackers, vandals or thieves.

The company's content filtering services also significantly enhance employee productivity by stopping inappropriate activities on the network, blocking spam, viruses and a wide range of other malicious code before it ever reaches the client's network.

In addition, SDI's email delivered Strategic Management Reports turn a customer's blind Internet pipe into a complete management information system that literally pays for itself in increased business insights.

SDI also offers email encryption, IP vulnerability scanning, and Intrusion Prevention Service alerting.

The bundling of these various services enable all size organizations to affordably protect their network and digital assets and also meet industry and legal regulation mandates.

Through a unique proprietary based remote management system, SDI provides clients with a complete multilayered network perimeter defense plan that is effective, dynamic, extremely affordable and easy to use. The company's speed of deployment, low cost structure, commitment to exceptional customer service and added partner business services are unprecedented and unmatched in the industry.

Founded in 2001, SDI is the premier low cost, high value provider of MSS for small to midsize organizations and also has a proven turnkey private label program for large partners.

The company pioneered and has become the premier provider in the U.S. delivering Enterprise Class MSS to Micro SMB Customers (<100 employees) and SDI now provides managed Internet security services to over 7,000 locations in 50 states and 5 countries.

SDI's proven logistics and experience enable it to deploy a new complete large scale private label MSS program in just weeks for new partners.

**SDI is unique in that the company provides "Fortune 500 Security For The Fortune 5 Million".**

*Based in Greensboro, NC, SDI, an Inc. 5000 and CRN Fast Growth 100 company, delivers its services from a state-of-the-art, carrier-class data operations and network center. With current capacity to manage hundreds of thousands of MSS locations.*
